Authorization for this examiner's amendment was given in a telephone interview with Mr. Kent Kokko on July 8, 2005.

- claim 15 has been amended as follows:

15. (Amended) A method for making a composite article comprising the step of laminating at least one microfiber layer further comprising oriented microfibers having an average effective average diameter less than about 20 microns and a transverse aspect ratio of from 1.5:1 to 20:1 to at least one polymer matrix layer.

- claim 18 has been amended as follows:

18. (Amended) A method for making a composite article, the method comprising the steps of:

providing a thermoplastic polymer;

providing a microfibrillated article further comprising oriented microfibers having an average effective average diameter less than about 20 microns and a transverse aspect ratio of from 1.5:1 to 20:1;

contacting the microfibrillated article with the thermoplastic polymer with heat and/or pressure.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a process for making a composite article including, providing a microfibrillated article/layer having oriented microfibers of an average effective average diameter less than about 20 microns and a transverse aspect ratio of from 1.5:1 to 20:1 and contacting said microfibrillated article with a polymer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
